## Announcing QI Macros Support for Office 365

(March 7, 2013 – PRWeb) **DENVER**, Colo. – KnowWare International, Inc. announces that the QI Macros Lean Six Sigma Software for Excel is fully compatible with Office 365 for Windows 7 and 8, and Macintosh OS X.

Office 365 is Microsoft's software-as-a-service that works in PCs and Macs, as well as in the cloud.

Office 365 works in both Windows 7 and 8, as well as Mac OSX. Once a user subscribes to Office 365, they can download and install the latest version of Office, which includes Excel 2013 for the PC or Excel 2011 for the Mac. The QI Macros is fully compatible with either Excel 2013 or Excel 2011, when installed on a computer. The Web App version of Excel does not yet support Visual Basic, but virtually all of the QI Macros templates can be used on the Web version of Office 365.

Along with Microsoft 2013, QI Macros is also compatible with all Windows 8 tablets. Visit the following link for a video review of the software: [www.qimacros.com/lean-six-sigma-blog/microsoft-surface-office-2013-qi-macros/](http://www.qimacros.com/lean-six-sigma-blog/microsoft-surface-office-2013-qi-macros/).

The QI Macros consists of four parts: 1.) 46 charts and two "Chart Wizards" that use existing Excel data to create pareto, control charts, and histograms; 2.) more than 90 fill-in-the-blank templates for Lean Six Sigma; 3.) a Statistics Wizard; and 4.) data transformation tools, such as the PivotTable Wizard that automates data analysis.

Unlike complex statistical tools, the QI Macros tools can be used by anyone from students to Six Sigma Black Belts. Users most often say that the QI Macros is convenient and hassle free, is easy to learn, works directly on Excel data, and automates the most commonly used Lean Six Sigma improvement tools.

At only \$199 (thousands less than competitors), QI Macros is the least expensive, most robust solution available on the market.

To purchase a copy of QI Macros for Excel, visit: <http://www.qimacros.com/store>.

Download a 30-day evaluation copy of the QI Macros for Excel at: <http://www.qimacros.com/trial/30-day/>.
