## KnowWare International to Exhibit at the IHI Conference in Orlando

**Denver, CO - December 2, 2013** - KnowWare International will attend the 25<sup>th</sup> annual [IHI](#) (Institute for Healthcare Improvement) National Forum on Quality Improvement in Health Care. The event will take place in Orlando, Florida on December 8<sup>th</sup>-11<sup>th</sup>.

The U.S. could save an estimated \$1 trillion of healthcare's \$2.5 trillion cost. Improving healthcare quality and delivery could pay for Obamacare and slash the Federal Deficit. All that's needed are people dedicated to eliminating the problems that reduce availability and increase the cost of healthcare and a tool like the QI Macros™ to measure, monitor and sustain improvements.

KnowWare will demonstrate its QI Macros for Excel product and provide information and free trials to those interested in saving time, saving money and saving lives by finding and fixing the delays, defects and deviation that threaten patients and the U.S. economy.

To learn how to use the Magnificent Seven Tools of Lean Six Sigma to eliminate costs, boost productivity and save lives anyone can take KnowWare's free Lean Six Sigma Yellow Belt training at [www.lssyb.com](http://www.lssyb.com).

Jay Arthur is the author of Lean Six Sigma for Hospitals and the QI Macros SPC Software for Excel. Jay helped one hospital system save \$5 million/year in denied insurance claims and reduce cycle time in a hospital lab by seven hours per day. Participants in his one-day Lean Six Sigma for Hospitals seminars have found ways to cut nurse travel by 50% or more.

The QI Macros SPC Software contains 40+ charts and over 90+ fill-in-the-blank templates that simplify Lean Six Sigma complexities. QI Macros SPC Software for Excel work with Excel versions 2000-2013. At only \$229 (thousands less than competitors), they are the least expensive, most robust solution available on the market.

Download a 30-day evaluation copy of the QI Macros for Excel at <http://www.qimacros.com/trial/30-day/>.
