

Lean Six Sigma One Day Workshop

How to Reduce Costs and Increase Profits No Matter How Difficult It Was Before!

Typical Lean Six Sigma training takes 10-20 days spread over 2-4 months at costs ranging from \$5,000 to \$40,000 per person. **We do it in one day with up to 25 people for as little as \$650/ person).**

I call it Money Belt training, because we focus on teaching the essential methods and tools you need to start achieving results immediately.

Frankly, most people aren't ready for all of the complex methods and tools required to achieve Six Sigma. With Money Belt training, you only learn the essential tools necessary to start cutting costs and boosting profits.

If your company is like other successful and profitable companies, you may not be sure that Lean Six Sigma can improve your bottom line, but after working with all kinds of companies, I can tell you that most are successful and profitable while barely three sigma.

You don't need to be a Black Belt in statistical methods to start making big gains. You only need to know a few key methods and tools.

And we tailor our training to your company's data and needs, because you learn better when it's relevant to your job. We like to develop improvement stories right in the classroom so that you'll be ready to start root cause analysis immediately.

Jay Arthur works with companies that want to fire up their profits using Lean Six Sigma. Jay is the author of Lean Six Sigma Demystified, 2nd ed. (McGraw-Hill 2011) and Lean Six Sigma for Hospitals, 2nd ed. (McGraw-Hill 2016).
