

Professor Complimentary QI Macros Installation Request

KnowWare International, Inc. provides complimentary QI Macros installations for professors who teach in a traditional college or university classroom setting, whose students are enrolled through the college or university, and whose students are required to use QI Macros as part of the class.

Our goal is to provide professors with the tools they need to teach all aspects of Quality Improvement while fostering awareness of QI Macros in students through the student's hands-on use of the software in required coursework, with the hope that the students will purchase a license for use in their ongoing education (and ultimately, in their workplace).

Our recommendation is for the college or university to purchase a QI Macros student license on behalf of each student enrolled. QI Macros is the most affordable and robust Quality Improvement software on the market, and a perpetual license for a student is less costly than most textbooks required for college courses. A standard single user license starts at just \$379, but we offer QI Macros student licenses to students enrolled in courses that meet our criteria at a discounted rate of \$195 per student license.

You qualify for a complimentary professor installation if all of these apply:

- You are employed as a professor by a college or university.
- You intend to use QI Macros to teach classes for under-graduate or graduate level course credit.
- Your courses are held in a traditional classroom setting (not on-the-job).
- You are designated as the instructor of the course in the course syllabus.
- Your students are working toward an associate, undergraduate, or graduate degree.
- Your students are required to use QI Macros to complete required coursework.
- Your students are **not** medical residents.

You do *not* qualify for a complimentary professor installation if any of these apply:

- You do not fit the professor profile described above.
- You use QI Macros primarily for your own on-the-job tasks.
- You use QI Macros to train faculty, staff, co-workers, or friends.
- You use QI Macros to train medical residents at a teaching hospital.
- Your students are not required to use QI Macros to complete required coursework.
- You are a research assistant.
- You are not designated as the instructor of a course for which you are requesting a free installation.
- You cannot provide supporting documentation that designates you as the instructor of a college course.
- You want a free license to "vet" the QI Macros software. (A fully functioning 30-day trial is available.)

Please note that just as your university cannot offer free tuition for every student, we cannot provide free installations for every request.

If you believe you meet the criteria for a complimentary professor QI Macros installation, please complete the form on the following page and submit it to orders@qimacros.com for review. Please be sure to provide course web links *that clearly designate you as the instructor* or attach a PDF of the course syllabus that designates you as the instructor. Please allow 2 business days for review.

Thank you for your interest in QI Macros.

Professor Complimentary QI Macros Installation Request

Please complete all fields. Incomplete forms will not be considered:

	Yes	No
I am employed by a college or university as a professor.		
The class is taught within a traditional classroom setting (not on-the-job).		
The class or classes I teach are for under-graduate or graduate level course credit.		
My students are working towards an associate, undergraduate, or graduate degree.		
My students are employed by the same institution I am (e.g., co-workers, staff, medical residents, medical fellows, etc.)		
I will provide a web link course description that lists me as the instructor.		
If no to the above question, I have attached a PDF of a course syllabus that lists me as the instructor of the course.		
Students are required to use QI Macros in my course.		
QI Macros is listed in the course description or syllabus as a course requirement.		
My college would like students to have access to a non-expiring QI Macros license.
