

QI Macros Six Sigma SPC Software for Excel Exhibiting at Quality Expo, Sept. 20-22

DENVER, August 19, 2011– KnowWare International Inc., developers of the QI Macros Six Sigma SPC Software for Excel, will showcase the product at the Quality Expo in Chicago, September 20-22, 2011. Statistical software is a key ingredient in improving and maintaining the quality of manufactured goods. Six Sigma software is key to cutting costs and boosting profits.

Most manufacturing companies think that Six Sigma will take too long or cost too much. Manufacturing employees worry that they're not smart enough to use the math and statistics. They worry that they won't remember what chart or statistic to choose. The QI Macros Control Chart and Statistics Wizards make all of the worry out of math and statistics. They automatically figure out what to do and do it.

The QI Macros works in Excel 2000-2011 and is available for immediate download. The QI Macros have been simplifying process improvement and [Lean Six Sigma](#) for tens of thousands of customers since 1997. Thousands of manufacturing companies in the U.S. use the QI Macros to improve quality, cut costs and boost productivity. Thousands of businesses ranging from automotive suppliers to healthcare use the QI Macros to help reduce costs and boost productivity and profitability.

The QI Macros is the “Swiss Army Knife” of tools for companies embracing Lean Six Sigma which combines the speed and quality of the Toyota Production System (TPS). The QI Macros is an addin for Microsoft Excel that does the math and draws the graphs required for SPC— Statistical Process Control and Six Sigma. It also includes fill-in-the-blank templates for manufacturing-oriented Six Sigma tools like GageR&R, PPAP, Control Plans and many others.

Download a free, 30-day evaluation copy and user guide at <http://www.qimacros.com/freestuff.html>. They can also sign up for our free Lean Six Sigma Lessons on line and webinars.

<p>The QI Macros SPC Software contains 30+ charts and over 90 fill-in-the-blank templates for simplifying the complexities of Lean Six Sigma. And at only \$199 +S&H, they are the least expensive, most robust solution available on the market.</p>
