

Announcing Lean Six Sigma Green Belt and Black Belt Training and Certification

DENVER, Jan 25, 2012– KnowWare International Inc. has partnered with Premiere Performance Network to provide clients with onsite Lean Six Sigma Green Belt and Black Belt Training and Certification. Students will learn how to solve problems involving unnecessary and preventable delays, defects and deviation using the DMAIC (Define, Measure, Analyze, Improve and Control) process.

The Green Belt curriculum includes 10 days of training, case studies, and exercises to master the Lean Six Sigma Green Belt body of knowledge (as formulated by the American Society for Quality). These tools will solve over 90% of the problems facing service, manufacturing and healthcare businesses.

After completing the training and exercises, participants can complete the final exam and an improvement project for certification.

The Black Belt curriculum includes an additional 10 days of training, case studies and exercises to master the Black Belt body of knowledge. An additional exam and project are required for certification.

“While some companies want to jump straight to results, others are looking to weave the principles of Lean Six Sigma into their corporate culture using formal training,” said Jay Arthur. “That’s why we’ve decided to partner with a well-known training provider.”

Since it’s difficult, if not impossible, to do Six Sigma projects without software, participants will learn to use [The QI Macros Lean Six Sigma Software](#) which works in Excel 2000-2011 in Windows XP, Vista, Windows 7, and Mac OSX. The QI Macros have been simplifying process improvement and Lean Six Sigma for tens of thousands of customers since 1997.

Jay Arthur is the “Short Cut” to results with Lean Six Sigma. He has helped healthcare and telecom clients save millions. Black Belts, Green Belts and even “No Belts” use Jay’s streamlined approach to Lean Six Sigma, the Magnificent Seven Tools and the QI Macros for Excel to solve problems of delay, defects and deviation—the three silent killers of productivity and profitability.
